Outline for CM paper 100314.docx

FYI. The IEP Tidal Marsh Monitoring Project Work Team will start with a Conceptual Model paper that spells out what needs to be updated. The concept of Level 1-3 is reflected in it. Once Alice Lowe's team has the paper completed, it may become apparent how this effort can tie into recently updated Coordinated Work Plan for Wetland Conservation.

**Subject:** FW: Outline for Conceptual Models Paper

FYI. I was not able to attend this meeting and so don't know the context or potential use of this paper (Chris E. attended) but thought you might be interested in knowing it is happening.
